

SUPPLEMENTARY WATER ACCESS FOR NSW MURRAY VALLEY IRRIGATORS, 2011 – 2012 SEASON

8 July 2011

The NSW Office of Water has announced today that access to a period of supplementary water access would be extended to NSW irrigators in the Murray Valley.

Irrigators with a notified history of use supplementary access license are able to access supplementary water.

This announcement also means that general security licence holders can access 'uncontrolled flows' as the general security available water determination is less than 60% of entitlement.

Please note that normal water sharing plan rules apply as per the NSW Murray and Lower Darling Water sharing plan from 1 July 2011.

The total diversion of uncontrolled flow and general security water cannot exceed 110% of entitlement for the water year.

Customers wishing to access supplementary water must place a complying water order using one of the following options:

Accessing www.statewater.com.au and logging on to your iWAS account

Faxing your order to **1300 871 447**

Emailing your order to southorders@statewater.com.au

Telephoning your order to 1300 662 077 During business hours

Water order forms are available from the State Water web site www.statewater.com.au/water-order-application

At the completion of pumping supplementary water the finish reading must be notified by using one of the above four options. Failure to supply the finish reading will result in any water extracted being debited to general accounts.

Failure to provide this information will result in any water extracted being debited from ordinary accounts.

Customer Notice
