

SUPPLEMENTARY WATER ACCESS UPDATE FOR NSW MURRAY VALLEY IRRIGATORS, 2011 – 2012 SEASON

08 February 2012

The NSW Office of Water has announced today that access to a period of supplementary water access would be extended to NSW irrigators in the Murray Valley.

Unregulated flow in the River Murray in the reaches shown above has been extended due to continued high releases from Menindee Lakes. Please note that unregulated flows are not available in the Edward River system or the River Murray upstream of Barmah as these flows are currently close to the minimum required to meet downstream demand.

Further advice of unregulated flow will be issued on or before Wednesday 14 February 2012.

Irrigators with a notified history of use supplementary access license are able to access supplementary water.

Please note that normal water sharing plan rules apply as per the NSW Murray and Lower Darling Water sharing plan from 1 July 2011.

The total diversion of uncontrolled flow carry over and general security water cannot exceed 110% of entitlement for the water year.

Customers wishing to access supplementary water must place a complying water order using one of the following options:

Accessing www.statewater.com.au and logging on to your iWAS account

Faxing your order to **1300 871 447**

Emailing your order to southorders@statewater.com.au

Telephoning your order to 1300 662 077 During business hours

Water order forms are available from the State Water web site
www.statewater.com.au/water-order-application

At the completion of pumping supplementary water the finish reading must be notified by using one of the above four options. Failure to supply the finish reading will result in any water extracted being debited to general accounts.

Failure to provide this information will result in any water extracted being debited from ordinary accounts.

Customer Notice

The periods for access of supplementary water are as follows:

Section	Start 8:00am	Finish 8:00am
Murray River		
Hume Dam to Yarrawonga Weir		Not Available
