

SUPPLEMENTARY WATER ACCESS EXTENDED FOR MURRAY VALLEY IRRIGATORS

19 May 2011

The NSW Office of Water has announced today that an extension of a period of supplementary water access would be made available to NSW irrigators in the Murray Valley.

Supplementary water access will cease in the upper River Murray, Edward River, Colligen/Neimur system and Wakool/Yallakool system on the dates indicated as flow after these dates can potentially be captured in Lake Victoria.

This announcement also means that general security licence holders can no longer access 'uncontrolled flows' as the general security available water determination is greater than 60% of entitlement.

General security licence holders may continue to take water under their general security access licence.

Only Irrigators with a notified history of use Supplementary Access are able to access 'uncontrolled flow' water.

The total diversion of uncontrolled flow and general security water cannot exceed 100% of entitlement for the water year.

Customers wishing to access supplementary water must place a complying water order using one of the following options:

- Accessing WWW.statewater.com.au and logging on to your iWAS account
- Faxing your order to **1300 871 447**
- Emailing your order to southorders@statewater.com.au
- Telephoning your order to 1300 662 077 During business hours

Water order forms are available from the State Water web site www.statewater.com.au/water-order-application

At the completion of pumping supplementary water the finish reading must be notified by using one of the above four options. Failure to supply the finish reading will result in any water extracted being debited to general accounts.

Failure to provide this information will result in any water extracted being debited from ordinary accounts.

Customer Notice

The periods for access of supplementary water are as follows:

Section	Start 8:00am	Finish 8:00am
Murray River		
Hume Dam to Yarrawonga Weir	Not	Available
