

GLENNIES CREEK DAM UPDATE

Noon 25 November 2011

State Water advises that a controlled release from Glennies Creek Dam of 3,800 megalitres will commence at about noon today, Friday 25 November 2011. That release is about fifty percent more than the releases that occurred overnight.

Rain continues in the catchment, but the dam level is still about 800 millimetres below the level at which the automatic spillway operates.

For more information about storage levels and river heights go to the *Waterinfo Website* at www.waterinfo.nsw.gov.au.

Please visit the SES website www.ses.nsw.gov.au for information regarding potential flooding.

For weather forecasts, please visit the Bureau of Meteorology website www.bom.gov.au.

State Water will continue to advise landholders on its databases of any updates.
