

## SUPPLEMENTARY WATER ACCESS FOR MURRUMBIDGEE - UPDATE

19 July 2010

State Water's Water Delivery Manager for Murrumbidgee Valley, Ned Hamilton announced today that further periods of access to supplementary water are available (see page 2 for details of supplementary availability). Daily monitoring of the river has improved our estimated volume and timing of supplementary water.

The supplementary water is a result of inflows from the upstream tributaries in the Tumut and Murrumbidgee River systems, due to rainfall over the past week.

Customers wishing to access supplementary water must place a complying water order using one of the following options:

- Accessing [www.statewater.com.au](http://www.statewater.com.au) and logging on to your iWAS account.
- Faxing your order to **1300 871 447**
- Emailing your order to [southorders@statewater.com.au](mailto:southorders@statewater.com.au)
- Telephoning your order to **1300 662 077** During business hours

(Water order forms are available from the State Water web site  
<http://www.statewater.com.au/Documents/Custom%20Service%20library/Single%20licence%20water%20order%20form.pdf> )

At the completion of pumping supplementary water the finish reading must be notified by using one of the above four options. Failure to supply the finish reading will result in any water extracted being debited to general accounts.

State Water will continue to monitor the situation closely and will provide regular updates as more information becomes available.

For further information contact the Operations Officer, State Water Southern Valleys, Leeton (02) 6953 9800.

*(See page 2 for details of supplementary availability).*
